

Calculation	Correct	Not correct	Explanation
$\frac{1}{5} + \frac{2}{5} = \frac{3}{10}$			
$\frac{3}{8} + \frac{5}{8} = \frac{35}{8}$			
$\frac{1}{7} + \frac{3}{7} = \frac{4}{7}$			
$\frac{1}{8} + \frac{6}{8} = \frac{7}{16}$			
$\frac{6}{7} - \frac{2}{7} = \frac{4}{14}$			
$\frac{7}{10} - \frac{3}{10} = 4$			
$\frac{7}{8} - \frac{2}{8} = \frac{9}{8}$			
$\frac{4}{5} - \frac{3}{5} = \frac{1}{5}$
