

***Love one another. As I have loved you, so you must love one another.*** John 13:34-35

## **Gospel Values in our curriculum**

### **Subject: Science**

|                                     |                                                                                                                                                                                                                                                      |
|-------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Faithfulness &amp; integrity</b> | Being honest when observing and recording results, carefully following methods, reporting findings truthfully, showing faithfulness to the scientific method.                                                                                        |
| <b>Dignity &amp; Compassion</b>     | Teaching respect for all living beings, promoting kindness towards animals and understanding the interconnectedness of life.                                                                                                                         |
| <b>Humility &amp; Gentleness</b>    | Accepting that we don't know everything and being patient when learning new concepts. Working patiently and collaboratively with others during experiments, using equipment carefully.                                                               |
| <b>Truth &amp; Justice</b>          | Ensuring that everyone has equal access to learning and resources and pupils work fairly during group work. Consider the ethical implications of Science, such as the impact of technology on communities and how Science can solve problems fairly. |
| <b>Forgiveness &amp; Mercy</b>      | Being patient with oneself and others when carrying out experiments, recognizing that errors may occur and helping pupils to recognise that it is important to forgive mistakes and try again.                                                       |
| <b>Purity &amp; Holiness</b>        | Encouraging respect for the natural world as God's creation, recognising our role as stewards of the world and its resources. Teaching about pollution and ways to keep the environment pure, through recycling and reducing waste.                  |
| <b>Tolerance &amp; Peace</b>        | Appreciating different ideas and respecting diverse opinions during scientific discussions. Promoting teamwork where pupils listen to each other's ideas peacefully.                                                                                 |
| <b>Service &amp; Sacrifice</b>      | Teaching that Scientific knowledge can help others, by understanding health and healthy living, improving quality of life and protecting their local environment.                                                                                    |
